

CARBON LITERACY

This course provides an in-depth understanding of climate change, sustainability, and how individuals and businesses can reduce their carbon footprint. Participants will gain practical knowledge on making sustainable choices in their personal and professional lives.

DATE

27 June 2025

4 July 2025

TIME

9.30 - 13.00

LOCATION

Crawley College

COST

£180

COURSE CONTENT

1 Greenhouse gases and climate change:

Learn about the causes and effects of climate change, including its impact on the environment and society.

2 Reducing carbon impact:

Discover strategies for lowering energy consumption, minimising waste, and adopting sustainable habits.

3 Local and national environmental efforts:

Explore initiatives by governments and communities to combat climate change and promote sustainability.

4 Action planning:

Develop a personalised sustainability strategy for reducing carbon emissions in daily life or within a business.

WHO CAN JOIN?

This course is open to anyone interested in sustainability and climate action.

NEXT STEPS

Participants will receive a carbon literacy certificate.

Please note: All courses are subject to demand and tutor availability. Course fees and details are accurate for the current academic year.
